Question No. 1 of 1

I looked at the SOW Enterprise Project Management Software, and I have one question. We are not a Microsoft Gold Partner, but we have a sub-contractor who is a Microsoft Gold Partner and they have a SharePoint Server 2010 expert available. Would a Corp to Corp situation with the sub-contractor being a certified Microsoft Gold Partner acceptable?

Answer No. 1 of 1

No. It is preferred that the consultant we have contact and work with has certified technical experience as a Microsoft Gold Partner.
